The

OHIO Alumnus

The annual Fund report is completed and soon it will be in the hands of 29,096 alumni of the University. When yours arrives it will be easily distinguishable, for the cover is an eye-catching, four-color picture of the new campus gateway with Alumni Memorial Auditorium in the background. It is a significant report, for it will tell you at a glance the measure of Alumni and Friends' commitment to excellence through financial support last year. It is significant, too, because it announces even more ambitions and important giving programs for the year ahead. We know you will concur as we raise our sights even higher. For only through an enlarging circle of Alumni and Friends can the University move ahead toward its goal of excellence in teaching, research, and service. The pace of our progress is measured by

These are:

Honor Membership which is for life and includes those persons who have designated \$100. either in one payment or \$25 for four consecutive years, to the Alumni Association.

Jacob Lindley Society in which membership is renewable annually and includes those individuals who have presented a gift of at least \$250.

The 1804 Society in which membership is renewable annually and includes Alumni and Friends who elect to become members through a contribution of \$500 or more.

If you have not yet taken your step, we hope you will consider one of these groups during the 1962-63 Alumni and Friends Giving Drive, which is explained fully in the annual report on its way to you.

THE COVER

Year around operation of the University, a measure now under careful study at Ohio and other major universities across the nation, is the subject of this month's cover and the lead article beginning on page 5. Alumni are invited to take part in the study by sending their comments on this important subject to the Alumni Office.

THE OHIO ALUMNUS is published monthly in October, November, December, January, March, April, May & June by the Ohio University Alumni Association. The annual subscription rate of \$4.00 includes membership in The Ohio University Alumni Association. Remittance should be made by check or money order payable to The Ohio University Alumni Association, P.O. Box 285, Athens. Entered as second class matter, October 3, 1923, at the post office at Athens, Ohio, under the Act of March 3, 1879. Printed at The Lawhead Press, Inc., Athens, Ohio.

Is the "Academic Year" Passé?

*Year around operation of American universities
is just around the corner, but there are problems
which may not be evident to the casual observer.*

THE EDUCATED man today must have both a liberal and a professional education to cope with the complexities of our world; he must be ready at an increasingly early age to take his place in society; and he must comprehend an ever-increasing body of knowledge. To accomplish these ends, programs can be expanded, standards can be raised, plant and equipment can be augmented.

Time is the only factor which is inelastic. Yet time is of prime concern in realizing these objectives. Since the time available for the education of young people cannot realistically be increased, it must be used as fully as possible.

In the same breath, as more and more high school graduates flock to our colleges and universities, educators, administrative officials, and legislators are casting a wary eye on the ever-increasing funds that will be needed for housing facilities, classrooms, and additional salaries to properly train these future leaders of our country.

Many colleges and universities, Ohio University included, have recognized the possible need for a drastic overhaul of the academic calendar. A university's academic calendar is subject to the same pressures as other academic matters. The desire to tailor it to the particular educational philosophy of the college, which in itself raises conflicts, and the advantages of conforming to the main features of the civil calendar and the general calendar pattern make it a worthy subject.

Early last year Ohio University took the first step toward a proposed calendar change with the creation of a seven-man faculty committee to examine several proposals that are now or will go into effect at two major universities.

The committee is headed by Dr. H. E. Benz, professor of education. Members include: Dr. Claude Kantner, professor of dramatic art and speech; Dr. Karl Ahrendt, professor of music; Dr. John E. Edwards, professor of physics; Dr. Karl Krauskopf, professor of advertising; Dr. Carl L. Shermer, professor of civil engineering; and Dr. Edward Stone, professor of English.

The proposal which the committee is examining and which presently shows the most promise is similar to the one which is being proposed at the University of Michigan. It differs somewhat from the "tri-mester" plan adopted at the University of Pittsburgh, but has some similarities. The proposal now being studied by Ohio University is also under study at Miami University.

The present proposal, which Dr. Benz describes as "in its early stages," calls for the fall semester to begin early enough so that it can be terminated before the Christmas vacation. The second semester would begin early in January and last until the end of April.

Two short terms, similar to the former 8-week session, would supplant the present two five-week sessions. Each term would be independent, or self-contained, with courses completed within the term. Each would be approximately equal to a half-semester. The first term would run from approximately April 15-20 to June 12-16. The second would follow this. The second short term would then meet the needs and the schedules of public school personnel.

In issuing its first draft of the proposal to the faculty in June, the committee listed these comments:

1. There is reason to believe that legislatures are going to be very much interested in the greater utilization of state university facilities. It is quite likely that when the expected wave of students hits the universities in 1963, 1964, or 1965, with many being turned away because of inadequate space, all sorts of pressures will develop to make it possible to service these students. Many people think that more students should go through college in three years. It is true that students can now complete their work in three years, by taking advantage of existing summer sessions, but very few do this. Calendar revision such as here proposed takes a step in the direction of encouraging longer attendance.

2. There is some criticism of the January "lame-duck" session, as we have it at present. A few teachers feel that the month is almost wasted.

(Continued on Next Page)

3. The present five-week summer terms leave much to be desired. Many teachers feel that the learning situation is unsatisfactory, and that a longer term is more desirable.

4. It should be noted that a student who stays in school for the two regular semesters, and the spring short term (under the plan being considered), if he takes 16+16+8 hours, at the end of three years would be within four hours of graduation. Attendance at one summer short term would be necessary, although the pursuit of an overload would make even this unnecessary.

5. The transition to an arrangement such as here proposed would involve a minimum of dislocation for all concerned. The two regular semesters would simply start and terminate earlier. Each of the two short terms would correspond in organization to our former summer session, with which many of the faculty have had considerable experience.

6. A possible alternative is to put on the short terms in the months of January and February, between the regular semesters. This would probably encourage greater student attendance, thus providing more faculty employment for two and a half semesters.

7. It should be noted and emphasized that any plan of operation which keeps more students on the campus for a larger fraction of the year, will cost more money. The proposed plan should not be looked upon as reducing the annual cost of operating Ohio University. On the contrary, it will increase it. Increased tenancy of buildings will result in greater depreciation and greater maintenance costs. Increased enrollment will involve greater expenses for instructional materials. Increased enrollment during the summer months, as well as the earlier September opening, will necessitate extensive expansion of air-conditioning facilities. Finally, the thoroughly defensible assumption that faculty remuneration should be proportional to the length of the period of employment, will make greater increased appropriations for personal service necessary.

Dr. Benz is quick to point out that his committee is just starting. "We've met only five times, and the only action taken, although not formal, was to eliminate the four-quarter calendar system. Our committee is directing its efforts toward making the whole system as flexible as possible to meet the needs of both students and faculty."

Ohio University is not alone in its concern with its academic calendar. At a conference on year-around operation at the University of Pittsburgh on March 9, 1961, some 75 institutions were represented; many with problems and concerns similar to those just mentioned. Within the last two years, programs designed to achieve year-around operation have been announced by the University of Pittsburgh, Pennsylvania State University, the University of Pennsylvania, and the University of California. Major changes in the scheduling of classes have been put into effect at Rutgers University and Dartmouth College. Ohio State University has recently completed a reappraisal of its quarter system and its alternatives.

Closely linked to the discussion are the arguments against year-around education. The following statements,

taken from the University of Michigan faculty committee report, are often put forward:

1. The two-semester pattern is well established in colleges and universities, and in the near future is not likely to be abandoned in most of them.

2. Many, if not all, courses would have to be redeveloped, and, in case of laboratories, at considerable expense.

3. The inter-relationship between courses, within programs, within schools and colleges, and between schools and colleges would have to be worked out all over again.

4. Any condensation of semester courses into quarter-length courses,—by scheduling four or five meetings a week instead of three—may diminish their effectiveness in the judgment of some persons, since students would have less time to assimilate materials with the span of a shorter term than the traditional semester.

5. Some extra-curricular features in the University, such as the athletic programs, might be adversely affected.

6. Faculty members might be tempted to teach too many terms consecutively with bad results both for the teacher and the student.

7. Questions of salary are bound to arise.

8. The student will lose his sense of identification in a class.

9. It is precisely during those periods when classes are not in session that faculty members do the bulk of the research and the writing upon which the growth and the reputation of the University rests.

Ohio University, to a considerable degree, is already on year-around operation. Nearly five thousand students attended our summer school. Offices and laboratories in many departments and professional schools are constantly occupied. Graduate study and sponsored research already continue throughout the year.

As academic activities at Ohio University, as in other colleges and universities, become more university oriented, i.e., directed increasingly to graduate and professional training and toward scholarly inquiry, the facilities of the institution are used more and more continuously and fully. Faculty members and graduate students, project directors and their staffs, need libraries and laboratories and offices whether or not the university is in session. Year-round operation, accordingly, is already the practice in many areas, and will become more widespread.

When a change, if any, is made, the time period involved is gradual. No change in the mode of university operation should be recommended merely for the sake of a "new look" which, although it might well have a stimulating effect, would carry a heavy price tag not only in terms of the loss of many years for remodeling the parts of its complex system, but also because of the certain loss of some of the subtle values which make it a distinguished University.

Ohio University will welcome comments concerning the proposal now under study by the faculty committee. Letters should be sent to the Alumni Office, Ohio University, Athens, Ohio.

Summers Are Busy Now

SUMMER VISITORS to Ohio University often express surprise at the pace of activities during the traditional "vacation" months. For the University already is operating on a year around basis from the standpoint of utilizing facilities and personnel.

The day following June Commencement, 190 participants in the Ohio School of Banking arrived on campus. Two days later, 1348 Boys Staters and staff took over East Green. Other summer programs—24 in all—followed in rapid succession, with considerable overlapping, bringing more than 8200 men and women to Ohio University for conferences and workshops. Groups ranged in size from 3000 Rainbow Girls to 15 members of the Shakespeare Festival. Programs varied in length from an eight-week Peace Corps training project to a two-day Conference on School Administration.

In addition to these and the 5000 students enrolled in the two Summer Sessions, nearly 2400 freshmen scheduled to enter in the fall spent two days in the Summer Pre-Counseling sessions conducted by the University College.

Sandwiched in whenever possible were the inevitable chores of summer repairs and cleaning, compounded this year by the evacuation of Ellis Hall (for renovation) and the resulting frustration of finding temporary office quarters on an already crowded campus.

CONSTRUCTION OF THE NEW Ohio University West Green dormitory project continued at full speed. When students returned in September Grosvenor Hall was ready for full occupancy. Parks Hall, although still under construction, was partially completed and capable of housing students. A third dormitory, yet to be named, was under way. The housing site is across the street from the Graver Physical Education Center on Richland Avenue.

STANDARD PROCEDURE for many of the high school students attending summer workshops on campus was the unloading of suitcases and slowly getting acquainted with new surroundings and college customs.

THE FIRST NEW sorority house ever to be built on the Ohio University campus was completed shortly before the fall semester opened. The new house, located on the corner of S. College Street and Church Street, is occupied by the Phi Mu's. Many other fraternal groups made major physical improvements to their houses during the summer vacation.

SARGENT SHRIVER, director of the Peace Corps, shown here being welcomed to the campus by President Vernon R. Alden and Dr. Roy P. Fairfield, professor of government, visited Athens in July to speak to 50 Peace Corps volunteers being trained at Ohio University.

FOUR PEACE CORPS volunteers, along with Dr. Roy P. Fairfield, director of the project on the Ohio campus, study the map of Africa. The volunteers, after 10 weeks of study, left early in September for two years of service in the West Cameroons. The project was the first of its kind ever conducted on the Ohio University campus.

THEATER-GOERS were treated to six Broadway productions given in the Speech building. Casts were selected from summer students in drama and local townspeople. Scenes like the one above, taken from the delightful comedy "The Women", highlighted another season for the Ohio Valley Summer Theater.

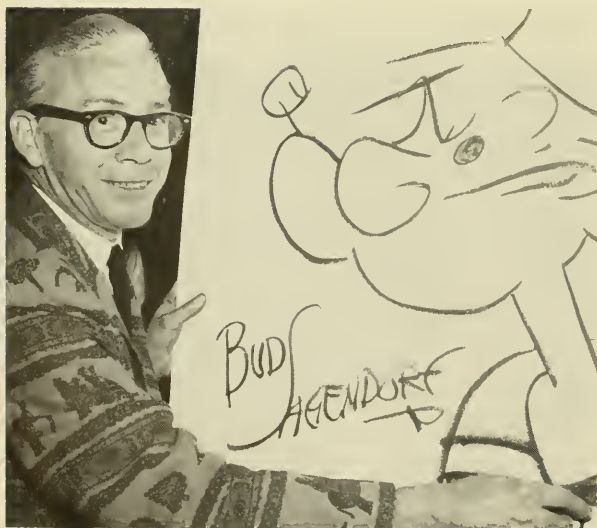

AMERICAN LEGION BASEBALL provided sports enthusiasts a chance to watch future major leaguers in action the last week in July. Fourteen teams from all areas of Ohio converged on Athens, and when the week-long tourney ended, Cincinnati took home the coveted trophy. The lad above, being picked-off first base, probably wasn't smiling when he returned to the dugout. This action was taken during a game between Steubenville and Elyria.

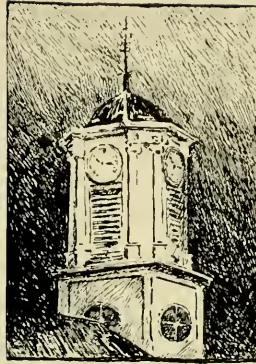

AUTOMATION in School Administration, was the theme of the Conference on Educational Administration which attracted national attention. Directed by Dr. Samuel I. Hicks (right), the program combined discussions, major addresses, and demonstrations by leading automation firms.

NOTED AUTHOR, newspaper editor, and visiting lecturer Harry Golden, visited the campus late in June and spoke at a morning convocation. Golden, editor of the Carolina Isrealite, has authored three best-selling books, "For 2c Plain," "Only in America," and "Enjoy! Enjoy!"

BUD SAGENDORF, creator of that spinach eating sailor, Popeye, demonstrated his artistic skills for the Journalism workshopers. Another notable artist in his field, Carmen Dragon, conductor of the Hollywood Bowl Symphony Orchestra, was present for the Music Workshop shortly after June graduation.

Most Universities

Have A Tower

MOST UNIVERSITIES have a tower. Tall or massive, soaring or brooding, graceful or ungainly, it presides over the campus as the symbol of a seat of learning.

Cutler Tower is Ohio University's traditional tower. As most towers Cutler sees in every direction, behind and ahead. For one hundred thirty-six years it has beckoned the wanderer and guided the uncertain. Its chimes sing of serenity and challenge. The shadow cast by Cutler Tower lies long and broad across every land and touches every civilized being.

For in this University, man has created his mechanism for preserving and understanding his past to serve his present and future.

It is proper for each generation— and this one perhaps more than any other—to inquire into its universities, to test their excellence, to question their progress, and to search their motives.

No less do the universities deserve the thoughtful attention of society as a whole, for their cause is ultimately the cause of man, neglected or taken for granted at the peril of man.

In this spirit the Ohio University Fund this month will ask each alumnus to consider the University, in the hope that some sense of the excitement and purpose that flows through it will be rekindled in their minds.

on the green

SUMMER COMMENCEMENT. establishment of two new academic programs, several large monetary grants, and the largest fall semester enrollment in the school's history marked the opening of another academic year for Ohio University.

THERE WERE 420 degrees conferred at summer commencement Saturday August 25 in Memorial Auditorium. Those attending the 199th commencement exercises heard Neil E. Harlan, assistant secretary of the Air Force for Financial Management, give the main address. Harlan, who holds both master's and doctor's degree from Harvard University, was on the faculty of the university's Graduate School of Business Administration prior to his appointment to the Air Force post in January of this year.

DR. HARLAN

THE NEW ACADEMIC programs, leading to doctoral degrees in English and clinical-counseling psychology, were approved by the Board of Trustees and will be launched

with the fall semester of 1963. Their approval followed years of preparation in both areas of study, climaxed by visitations from specialists who provided evaluations of the proposed programs. Problems of upgrading library facilities, working out details of new curricula, and providing for increased research activity were carried on by the Departments of English and Psychology, with the guidance of the Graduate College. The new programs bring the total number of Ohio University doctoral offerings to six. Others are in chemistry, speech, education, and physics.

FOUR GRANTS from the National Science Foundation totaling \$69,780, and a \$70,000 Technical Assistance Grant from the Area Redevelopment Administration of the United States Department of Commerce were acknowledged by University officials. A large portion of the Science Foundation grant will be used to cover a research project entitled "Thermal Cyclization Reactions." The research work will be under the direction of William D. Huntsman, professor of chemistry. The Technical Assistance grant will be used for the utilization of university resources and services of an Industrial Consultant, development of new product in-

dustry and expansion of existing industry, and the formation of an active unit in the College of Business Administration for continuous economic development activity.

THE BIGGEST ANNOUNCEMENT made by Ohio University came with the signing of a \$493,000 contract with the United States State Department's Agency for International Development for a teaching project in Vietnam. The project, which began September 1, involves six educators from this country during the academic year 1962-63. Dr. Homer L. Bradshaw, assistant professor of psychology at Ohio University, along with Dr. John Gee of Bowling Green State University, were scheduled to begin the project, to be joined later by the other four members. The project team will work with the University of Hue and the University of Saigon, both Vietnam universities. The Vietnam project brings the total federal investment in Ohio University overseas projects to some \$1,500,000 for the coming academic year.

STUDENT ENROLLMENT for the fall semester is expected to top 9400, according to early estimates made by Admissions Director Clark E. Williams. Of this total, nearly 3000 will be beginning their freshmen year. This year's expected enrollment, if correct, will far surpass the 1961 total of 8860. Approximately 2400 of the new freshmen were on campus late in July to complete the necessary pre-college tests and counseling sessions.

PRESIDENT VERNON R. ALDEN announced that Ohio University's budget for the 1962-63 academic year is \$17,000,000, of which \$5,500,000, or about 32 percent, will come from state appropriations. Dr. Alden added that \$9,800,000 will come from student fees and charges, and \$1,700,000 from federal grants for research, overseas projects and from private gifts. The University plans capital expenditures totaling \$7,169,000, of which some \$5,797,000 will be borrowed from the Federal Housing & Home Finance Agency, for construction of dormitories. More than 2000 of the expected 9400 students enrolling this fall were forced to seek accommodations in off-campus housing because of insufficient dormitory space.

CONSTRUCTION BEGAN August 2 on a tower which will enable Ohio University's recently-approved educational television station to begin broadcasting sometime this fall. President Alden broke ground for the 814-foot tower in ceremonies at the construction site, three miles southeast of Athens. Vincent Jukes, director of radio and television for the University, said he expects the station to go on the air about October 15.

JOHN F. MILAR was named treasurer of Ohio University, to succeed Paul R. O'Brien, who earlier had been named vice president for business affairs. Milar, assistant treasurer since 1958, was graduated from Ohio University in 1952 and the Harvard University Graduate School of Business Administration in 1954.

MR. MILAR

TWO NEW ADMINISTRATIVE appointments were announced during the summer. Thomas R. Forbes, Jr., a recent graduate of the Harvard University Graduate School of Business Administration, is administrative assistant to Dr. Thomas Smith, vice president for academic affairs. Edward R. Beckett, Jr., is assistant registrar and liaison between the Registrar's Office and the operation of IBM

equipment installed this summer. Prior to his appointment, Beckett was associated with Science Research Associates in Chicago.

KENNETH KRAMER, managing editor of Business Week magazine, was the guest speaker at the closing banquet of the eleventh annual Ohio Workshop on Economic Education that was held on campus in July. The Workshop was sponsored jointly by the Ohio Council on Economic Education and the Colleges of Business Administration and Education of Ohio University.

NEW DATE for Ohio University's participation in the "G. E. College Bowl" television program over the CBS Network is December 16. Originally scheduled to appear in June, the Ohio team of three men and one woman was forced into a postponement when one of the programs was pre-empted by a special news telecast on the John Glenn flight. Members of the Ohio team are David Orr, Youngstown; Jon Miller, Portsmouth; Martha O'Malley, Wilmette, Illinois; and Steve Estrin, Yonkers, N. Y. George L. Murphy, Athens, is the alternate. Coaches are Professors Paul Brandes, George D. Meinhold, and Lloyd I. Watkins. Tickets to the program, which originates in New York City, will be available to alumni.

VARIETY SHOW on WSAZ Television, Huntington, W. Va., October 11, will feature both faculty and students from Ohio University. The program saluting the University will be from 9-10 a.m. and will include films of the campus, as well as the live telecast of music and drama groups.

PORTSMOUTH BRANCH COLLEGE, first in the state to have its own building, may soon acquire land for a campus. The city council is considering an urban renewal project to make land in downtown Portsmouth available for college expansion. Griffin Hall, a remodeled elementary school, already is crowded. Enrollment last year was 520, and this fall it is expected to exceed 700. A four-block site located immediately east of the branch already has been approved by U. S. officials for urban renewal, and some citizens prefer this area for the campus site. City councilmen have proposed another site, which contains some buildings that might be adequate to include in the campus.

Faculty Briefs: Dr. John E. Edwards, professor of chemistry, is co-author of an article entitled, "Kronig-

Structure Variations in the X-Ray Absorption Spectra of a Copper Single Crystal," that appeared in a recent issue of The Journal of Chemical Physics. Dr. Samuel E. Pisaro, associate professor of education, is co-author of a college textbook entitled "Learning Concepts: Psychology in the Classroom." The book was published by the State Publishing Co., St. Louis. Donald C. Darnton, assistant professor of economics, has been named director of the Division of Research in the Ohio University College of Business Administration. Dr. Darnton recently completed a study of the forces which influence plant

DR. DARNTON

location in the Upper Ohio River Valley. Edwin J. Taylor, dean of the College of Engineering and Technology, was one of 43 persons selected to take part in the 11th General Motors Conference for Engineering and Science Educators held in Detroit, Mich., in July. Dr. Lawrence P. Eblin, professor of chemistry, has been named to a panel of scientists and science educators who will evaluate proposals for 1963 summer institutes for high school and college teachers of science, mathematics and engineering. Dr. Richard Ham, supervisor of clinical services at the University Speech and Hearing Center, attended a short course on the Examination and Rehabilitation of Adult Aphasics at the University of Michigan. Dr. Roger C. Quisenberry, professor of electrical engineering, attended a four-week summer institute on Reactor Experimentation at the University of Florida. Dr. Bernard R. Black, assistant dean of the University College and associate professor of human relations, has been appointed to represent the American College Personnel Association on the Professional Preparation and Standards Committee of the American Personnel and Guidance Association.

Bobcat Roundup

By Rowland Congdon, '49

THE 1962 FOOTBALL SEASON is the first in which every opponent on the Bobcat schedule is classified "major." This was assured in August when the classification committee of the Football Writers Association elevated seven schools, five of them Ohio opponents, to "major" status.

The act also gave the Mid-American Conference a "major" classification for football as it has been for many years in other sports. Of the seven schools re-classified, four were from the Mid-American. These were Kent State, Marshall, Toledo and Western Michigan. They join Bowling Green, Miami and Ohio University in this classification. The latter trio reached this status a year ago.

The other school on Ohio's schedule, not before classified as "major", was Buffalo, and it now has reached this status also.

In their first year as a "major" football team, Ohio led the nation in two relatively obscure, but, nevertheless, important statistical tabulations of the National Collegiate Athletic Bureau.

Revelation of these statistics brought a smile of satisfaction to the face of Coach Bill Hess. For they are two philosophies of football which he believes necessary to have football success. The categories in which Ohio led in 1961 were "pass interception avoidance" and "least penalized."

Hess often stresses that he believes it necessary to have a team which holds passing to a minimum so as to prevent interceptions, and to lessen mistakes. The 1961 Bobcats received 21 penalties in nine games for 168 yards, an 18.7 average, lowest of any "major" team. They also had only one pass interception out of 98 attempts for a percentage of .010. This was the best theft avoidance ever for that much throwing, reported the NCAB.

Perhaps the 1961 Bobcats did not have the success some thought they should. The record was 5-3-1 overall and 3-2-1 in the MAC, good only for fourth place. But the Bobcats were only one point away from the champion, losing 7-6 to Bowling Green; tied the second place team, Western Michigan, 20-20, and defeated third place Miami, 28-18. The 23-17 early-season loss to eventually last place Kent State sealed their doom.

A phase of the game which cannot be avoided when speaking of Ohio's 1961 season or possible 1962 success is placekicking. Ohio has what Coach Hess calls a "coach's dream" in this phase. He is Jim McKee, 6-3, 205-pounder from Mariemont, a suburb of Cincinnati. His value is that he can kick the long one.

In 1961, McKee tied or won at least four games with his placekicking. His six field goals ranged from 22 to 48 yards, an average of 34.5 yards per kick. Most dramatic of these was his 48-yard boot in the last second of play to defeat Delaware, 17-16.

Hess looks for his 1962 team—his fifth at Ohio—to rate along with his 1961 aggregation at the start of the season. He claimed the team a year ago would go into each game rated "even" with each opponent on the schedule, and that breaks and other factors would determine each game's outcome. He claims the same in '62. When teams rate evenly "on paper", Hess feels that "condition, attitude and morale plus breaks of the game" will determine the outcome.

The 1962 team has good overall size, decent overall team speed and experience at end, quarterback, and tackle. Of the 17 lettermen, eight are at these positions. Each backfield spot, however, has two lettermen. Center and guard are the two spots most devoid of experience with no lettermen at center and only two at guard.

However, Hess feels that some topnotch sophomore prospects will aid these and other positions. He considers this year's sophomore crop as the best overall that he has had in five years. "These sophomores will help to give us more depth than we had last year," Hess admits.

Though there are eight lettermen in the backfield, "we lack great speed there," Hess goes on. "If our young players come through for us, however, we can give anyone a run for the championship."

Hess remarked, "I seem to say this every year, but it's true. The Mid-American Conference is getting better every year. On a given Saturday, any team is capable of knocking off any other." Kent proved this against Ohio last year.

At opening practice Sept. 1, Hess had the first team alignment comprising these players:

Seniors Ken Smith and John Trevis, the co-captains, at ends; Chuck Nickoson, Cincinnati senior, and Ron Stepsis, Cleveland sophomore, at the tackles; Bill Taraschke, Toledo junior, and George Fisher, Toronto junior, at the guards, with sophomore "Skip" Hoovler, Pataskala, at center.

The backfield was composed of Bob Babbitt, Bexley senior, at quarterback; Jim Pontuti, senior from Youngstown, and Jim Albert, Canfield junior, at halfbacks, and Earl Evans, Marion senior, at fullback.

He Keeps The Bobcats Healthy

Al Hart, Ohio University Trainer

ATHLETES AT OHIO UNIVERSITY know their medical treatment for illness or injury is as good as can be found at any college or university in the country.

This they learn by becoming acquainted with Ohio University's trainer, the entire medical staff and the physical facilities available in both the Grover Physical Education Center and Peden Stadium.

Few collegiate athletic departments have X-Ray equipment within walking distance of play areas. But Ohio University does—in fact, three units and a skilled technician to operate them.

The co-ordinator of this entire setup is able, young Alan W. Hart, 26, who began his fourth year as head athletic trainer at Ohio University this summer. Probably no other incident has been of more importance to Hart than the one which he encountered on his first practical working day on the job, Sept. 1, 1959.

Hardly older at 23 than the members of the varsity football squad which he was servicing at the time, Hart performed an act which saved the life of one of the boys.

A sophomore back, playing defense, was blocked by an offensive man. The blow and resultant fall caused the boy to lose consciousness and swallow his tongue. Hart was there and knew what to do. He inserted an oral screw—a hard rubber, corrugated object about the size of a thumb—into the boy's mouth between his teeth. This enabled Hart to reach the boy's tongue which had been forced back into his throat and uncurl it to its normal position. He revived the boy who was soon on his feet.

Al is a native of Fairview Park, Ohio, a suburb of Cleveland. It was there as a high school sophomore that he first became interested in athletic training as a profession.

Leo Murphy, the trainer of the Cleveland Browns and a member of the community, visited the school while selling sporting goods. "I looked up to a man in his position (a professional football team trainer) and thought a lot of him as a person," Hart relates. "By talking with him,

I became interested in the field and used the information as the subject of an English class report on training as a profession."

Hart spent summers as a protege of Murphy at the Brown's training camp at Hiram College and gained much practical experience. After his graduation from high school in 1954, Hart enrolled the following September at Ohio "because a lot of his friends from the community were coming here." Murphy wrote a letter to Fred Schleicher, Ohio's trainer at the time, recommending he talk to Al.

"Fred needed a student assistant so I immediately was assigned to the basketball and track teams." Hart retained these duties through his four college years. From his sophomore year on he also was trainer for the freshman football team and assisted with the varsity.

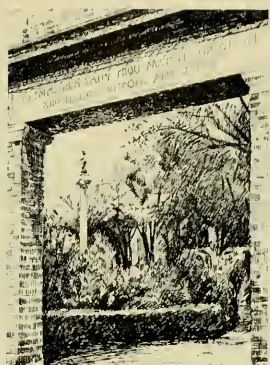

After achieving a bachelor of science in education degree, with a major in physical therapy, in 1958, Al was retained as full-time assistant trainer. He assumed the head job a year later. In August, 1959, he married Abigail Green of Marietta, Ohio, an Ohio University student.

Hart has continued the practice of using student assistants and this fall hopes to have four in his employe to help him with Ohio's ever-increasing intercollegiate athletic program of 11 sports.

In preparing for the coming football season, Hart procured the following supplies: the equivalent of 93 miles of adhesive tape and 280 miles of roller gauze bandage, one thousand elastic bandages; 20,000 band-aids; 15,000 sterile gauze pads; 25 gallons of rubbing alcohol; two gallons of cough syrup; 100 pounds of foot powder; one gallon of antiseptic; 50 pounds of analgesic balm; 10,000 aspirin tablets; 50,000 salt tablets; 10,000 vitamin tablets of various types; enough one-quarter inch sponge rubber to cover the floors of two rooms in an average house, enough drugs and vaccines to give about 300 shots (each player gets flu and polio injections and antibiotic shots as needed during the season); and X-Ray film and equipment to take an estimated 100 X-Rays during the season.

Most Universities

Have A Gate

“SO ENTER that daily thou mayest grow in knowledge, wisdom and love.” This inscription on the main gateway to the campus is familiar to alumni the world over. It is a motto which has inspired many successive generations of students.

Of course, there is another inscription on the other side of the gateway. The chiseled letters read: “So Depart That Daily Thou Mayest Better Serve Thy Fellowmen, Thy Country And Thy God.”

Ohio University has been very successful in its efforts to bestow upon students the real meaning of both of these traditional phrases.

But success can be a prod or a palliative—an ending or a beginning.

The present administration feels that with real thinking and effort on behalf of those who call Ohio University “my school,” that Ohio University can become an even greater institution.

As one alumnus has so aptly expressed himself, “I believe we must ask ourselves two questions: (1) Do I really believe in higher education? (2) If so, how much is it worth to me and to my children?”

This month The Ohio University Fund will afford YOU the opportunity to be of service to your school. Please give it some thought.

Alumni Scope

1902

CARL D. SHEPPARD is a lawyer in Akron, O.

1915

NEWMAN POWELL retired this year from a teaching career that has spanned 47 years. He taught Spanish at the McKinley High School in Canton, O. since 1949. Prior to that he taught in the Panama schools in Central America for several years and in the Canton Evening School. Mr. Powell is also an ordained Methodist minister and is still called upon to officiate at funerals. Mr. Powell is a man of many interests which include, writing, gardening and woodworking, he built the home in which he and his wife are now living. Mr. and Mrs. Powell reside in Canton, O., and have five children and 15 grandchildren.

1916

GROSVENOR STEWART McKEE is on the board of The Niagara Therapy Manufacturing Co., Adamsville, Pa. and the Action Discount Dollars Corp., New York City, N.Y.

1917

MARY EVERS retired recently after teaching elementary school for the past 45 years. Miss Evers, who resides in Xenia, O., is a member of Delta Kappa Gamma, national honorary teachers' sorority, the Western Ohio Teachers' Association and the National Education Association and its local and state chapters.

1922

VERNE H. LYNCH is employed by the Hardesty Realty Co. in Akron, O. as a salesman

MARGARET GEORGE retired this year thus ending a teaching career that has spanned more than 40 years. Her career began in the fall of 1917 when she worked in the superintendent's office of the Wellston School District for \$5.00 a month. Miss George who entered Ohio University in 1919, would return to Wellston for as much as six weeks at a time to do substitute teaching, and in this manner she was able to supplement her income and finish college. Miss George, who taught English, Spanish and journalism at Wellston High School, is also the past advisor for numerous organizations including: Tri-Hi-Y, the Wellston Chapter of the Business and Professional Woman's Club, the Wellston High School newspaper and also their yearbook. She resides in Wellston where she has lived all her life.

1925

EVELYN COULTER LUCHS and her husband, Dr. Fred E. Luchs spent a part of the summer in Europe on a youth project for the State Department. Dr. and Mrs. Luchs reside in Ann Arbor, Mich. where he is a minister at The First Congregational Church.

1926

WILMER RICE and NORMA KINCAIDE RICE, '25, have recently retired from the teaching profession after having compiled a total of 72 years of teaching school. Both were employed at Eastern High School near Tupper's Plains, O., where Mrs. Rice taught English and foreign language and Mr. Rice taught mathematics. They have four children, two who are Ohio University graduates and two who graduated from Ohio State University.

1927

HENRY BEAVER retired this year thus bringing to an end a 35-year teaching career. Now that he has retired, Mr. Beaver plans to devote full time to his duties as an agent for the Grange Mutual Insurance, Ohio State Grange Insurance, and Traders Life Insurance Companies. He and his wife have two children, Bonnie Sue and Lowell.

1928

MARGARET L. WARNE is now retired from her teaching duties in Trenton, N.J.

1929

CLINTON E. HORN is an internal auditor for the Airborne Instruments Lab., Division of Cutler-Hammer, Inc., Deer Park, N.Y.

WILLIAM A. SMITH has been an educator and administrator for two decades and is now superintendent of the Amherst Public Schools in Amherst, O. Mr. Smith is also the secretary-treasurer of the Ohio Association of School Administrators for the eighth consecutive year. He and Mrs. Smith have three children, William, Jr., Janet and Richard.

CLARE E. SEARS is employed as a regional manager for the B.F. Goodyear Tire Co. in Gladwyne, Pa.

1931

EMMET G. WEAVER is the principal of Roseville Elementary School in Roseville, O. While in college, Mr. Weaver majored in mathematics and later came back to Ohio University and received his master's degree in elementary school administration. He and his wife, Florence, have two daughters.

1932

LEAVITT GARD works as a chemist for the Pittsburgh Plate Glass Co. in Barberton, O.

MAURICE PATRY is the president of the ADJUSTA Post Manufacturing Co. in Akron, O.

John L. Boros To Head Army Transportation Command

COLONEL JOHN L. BOROS, '41, was recently selected by the Department of the Army to command the 425th Transportation Command (MT). He was commissioned a 2nd Lt. in the Transportation Corps and spent 40 months in the North African and European campaigns during World War II. Following the war he commanded the 341st Transportation Group in the Army Reserve. He is presently employed by the Standard Oil Co. in Cleveland.

THE REVEREND HERMAN SECOW, who is the pastor of the Clarksburg Methodist Church in Clarksburg, O., was one of the 58 Ohio Methodist ministers who spent a month in Europe this past summer. Reverend Secow is a member of the Ohio Conference Methodist choir which gave an overseas concert series in France, Switzerland, Germany, Belgium, Holland, England, Wales and Scotland. Rev. Secow, his wife and two children, Gregg and Deanna reside in Clarksburg, O.

RUTH FOWLER BROWN was recently elected the national fourth vice president of the Alpha Xi Delta sorority. Mrs. Brown, who was the founder of the Ohio University Women's Club of Cleveland, was a 1959 recipient of the Ohio Alumni Association's Certificate of Merit for service to Alma Mater. She and her husband, GEORGE, '31, have one son, Ricky, who is currently enrolled at Ohio University.

JOHN EVERETT SPRAGUE is a material controls supervisor at the Anchor Hocking Glass Co. in Lancaster, O. He and his wife, Mildred, reside in Lancaster, O.

DR. PHIL SHERIDAN SHURRAGER is a professor and chairman of the Technology Center, Department of Psychology at the Illinois Institute of Technology in Chicago, Ill.

1933

WALTER J. PARSONS is assistant to the director of the Sales-Rubberset Co. in Newark, N. J.

1934

DAN R. HARMAN is a manager for the Division Audits division of the B. F. Goodrich Co. in Akron, O.

BOB ESSEX is working as a chemical lab manager for The Royal McBee Co. in Athens, O. Mr. Essex received his master's degree from Ohio University in chemistry and physics in 1940. He, his wife, Jerry, and their two sons, Robbie and Rickie live in Athens, O.

1935

JACK L. CHASIN is the vice president of the Terminal Construction Corp. in Wood Ridge, N. J.

BERNARD BERENS is the superintendent of the Youth Camp, an honor camp for boys from the Industrial School in Lancaster, located in Zaleski, O. In previous years Mr. Berens played basketball for the Akron Firestones.

STEPHEN JOHN BENEDICT, the executive head of the Wills Local Schools at Old Washington, O., has been listed in the latest edition of "Who's Who in American Education." This publication is listed as "an illustrated biographical directory of eminent educators of the United States and Canada." Mr. Benedict, who is also interested in writing and is the author of "Trends in Algebra", received his Master's from Ohio University in 1940. He is now residing in Cambridge, O.

1936

SELMA BECHOLDT BLAKE is employed by the Kupper Kimball & Van Ausdall, Inc. in West Hartford, Conn.

WILLIAM E. BURT is the assistant general manager of the southern division of the Royal McBee Corp. at Atlanta, Ga.

J. KENNETH DUTTS is the director of finished goods at Joseph E. Seagram & Sons, New York City, N. Y.

FLORENCE KUGLER has retired after spending 10 years as a school teacher, the last 24 years being spent at Woodrow Wilson High School in Youngstown, O., where she taught home economics. Miss Kugler, who is now living in Bridgeport, O., earned her master's degree from the University of Pittsburgh.

OZELLA ERVIN recently retired from the Wellston School District. Her retirement marks the end of a 57-year teaching career of which the last 37 years were spent as principal of Harvey Wells Elementary School. Miss Ervin taught school for several years before obtaining her degree from Ohio University through a long process of attending summer and extended term classes. Miss Ervin recalls that she was able to teach school after passing a teachers' examination given by a city board of examiners immediately after her graduation from high school in 1905. Miss Ervin resides in Wellston, O., and is a member of the Southeastern Ohio Education Association, the Ohio Education Association and the Presbyterian Church and its women's organizations.

1938

WILLIAM O. DeVOLL has recently been appointed professor-advisor in public and business administration training of the University of Michigan. In this capacity, Mr. DeVoll will be a member of a University of Michigan Advisory Team stationed at National Chengchi University, Taipei, Taiwan. His work for the next two years will pertain to executive development, training of trainers, and personnel administration among management personnel in the government of Nationalist China and among business and industry of Taiwan. Mr. DeVoll received his master's degree from Miami University in 1947 and has also completed special work in management development at the University of Michigan, Western Reserve University, University of Buffalo and through the National Training Laboratories at Washington, D. C. Mr. and Mrs. DeVoll, their daughter, Marianna, and son, David are now residing in Taiwan. Their eldest son, Jonathan stayed behind to finish his college training at Purdue University.

J. ROBERT WHITE is a deputy treasurer of Fairfield County, O. He has recently been named executive secretary and manager for the Lancaster Area Chamber of Commerce. Mr. and Mrs. White reside in Lancaster, O. and have two daughters, Sue Ann and Carolyn Marie.

1939

J. HOWARD HOUK, JR. is a senior supervising auditor at The Part of New York Authority, New York City, N. Y.

ROBERT W. MOYER is the principal of Wilmington High School in Circleville, O. Mr. Moyer, who represented the Ohio Education Association at the National Education Association Convention in Denver, Colo. last summer, is married and has two children Robert and Vivienne Kay. He earned his Master's from Ohio State University.

HARRY A. BENNETT is the superintendent of the Hillsboro City Schools in Hillsboro, O.

HAMILTON, G. LAING is employed as an assistant traffic manager of the Ford Motor Company's Lorain, O. plant. Mr. and Mrs. Laing have two children and reside in Euclid, O.

TARZAN MONDA, who is a division engineer of The Tinker Roller Bearing Co.'s, Steel and Tube Division, has recently been elected president of the Stark County chapter of the American Institute of Industrial Engineers. He and his wife have three children and reside in Lisbon, O.

ALLEN H. KNISLEY is a teacher of driver training in Fairborn High School. He and his wife, the former PHYLLIS KUDER, '42, who teaches ninth grade English at Central Jr. High School in Fairborn, have four children and reside in Fairborn, O.

STANLEY A. FRANCIS is a chemist for Texaco, Inc. in Beacon, N. Y.

ERLE H. BRIDGEWATER, JR. is the vice president of the Ohio State Bar Association. Mr. Bridgewater, who earned his law degree from Ohio State University, is affiliated with the firm of Rowland, Bridgewater and Gray in Athens, O.

1941

BURTON S. MASSIE is the director of marketing administration for the Royal McBee Corporation in New York City, N. Y.

MARCELLA HYDE FAIR is currently teaching freshman English at Chillicothe High School. She and her husband reside in Chillicothe, O.

VERA MYERS SCHLETZER has recently been named coordinator and co-director of the Women's Continuing Education Program (Minnesota Plan) at the University of Minnesota. He is survived by his wife, Dorothy Dyer Corner; a son, Donald D. Corner of Canton; a sister, Mrs. G. W. Minding of Columbus, and a grandson.

EDITH G. EVANS, '18, passed away recently in Athens. Prior to retiring three years ago, she taught school in Bellevue and Niles.

JOHN W. GALLAGHER, '50, died July 31, after suffering a heart attack. He was a resident of Wausau, Wis., (formerly of Barnesville, O.) at the time of his death. He is survived by his wife, Lena Gibson Gallagher and their five children, Jane, Tom, Melissa, Pat and Amy.

CAROLINE DEWAR, '20, passed away March 22.

WAYNE MOORE, '21, formerly a prominent school official in Tuscarawas County, passed away June 26, in the Crawford Nursing Home. He had been ill for one year.

LAUREN O. BITLER, '22, who until 1955 was executive director of the Cleveland Safety Council, died June 9, in his home in Olmsted Falls. Surviving are his wife, Ida; a son, L. C. Bitler and three grandchildren.

JAY VINCENT CASTLE, '22, passed away June 9, at his home in Houston, Texas. Formerly an employee of the Johns-Manville Co., he had been ill for more than three years. His wife is the former Anna Fouts, '22.

MADISON J. HUMPHREY, '23, a resident of Williamsfield, O., died June 7, in St. Luke's Hospital, Cleveland. He was formerly the president of the Ashtabula County Board of Education and president of the Ohio State Holstein Friesian Association. While he was attending Ohio University, Humphrey was manager of the 1921 football team.

HARMON A. THOMPSON, '24, died July 14, of a heart attack while on a hunting trip in Tionesta, Pa. He was a resident of Warren.

ATTENTION

The Alumni Office will appreciate it very much if you would notify it, *in advance*, when you plan to move. The Post Office charge for returning The Alumnus with your forwarding address is 8 cents; and for third class mail, the charge is 10 cents, which adds considerably to our postage bill.

The Wrights, left to right, Ed Jr., Marge, Ed Sr., and Marion

The Wrights Write

TIME, TALENT, MONEY, and the ambition of an Ohio University father and son team are being pooled to edit and publish the *Forest Hills, Ohio, Journal*, a weekly Cincinnati newspaper that carries the slogan, "A Home Newspaper Devoted To A Live And Growing Community."

Seven years ago Edward B. Wright, Jr., '61, then a junior in high school, first saw the need for a good weekly newspaper in the suburban area in which the Wrights lived. The area, which includes Mt. Washington, Anderson Township, Newtown, and western portions of Clermont County, is now considered to be the fastest growing section in Greater Cincinnati.

Ed knew at the time that his dream of editing a weekly newspaper was financially impossible. He also knew that his father, Edward B. Wright, Sr., '38, an advertising budget control executive with the Procter & Gamble Co. in Cincinnati, wanted him to attend college.

Classes in news writing, newspaper management, photography, and reporting made him certain he could handle the job of editing a weekly newspaper if he were given the opportunity. In his spare time he wrote for the *Post and Athena*, and served as a reporter for the *Athens Messenger*.

Ed doesn't recall how he came about discussing his dream with his father, but from all indications it didn't take much explanation on Ed Jr.'s part for Ed Sr. to see that such a business could prosper in a growing community. Ed Sr. resigned his advertising position in August, 1960, and began the extremely difficult and tiresome, sometimes discouraging task of organizing the Forest Hills Publishing Co. With the aid of a friend, and after months of concentrated effort, the publishing company was formed in January, 1961.

A spacious brick, colonial style building was built and leased to the company. Equipment was purchased and em-

ployees hired during the late winter and early spring. While the plans were being laid at home, Ed Jr. was busy in Athens gathering ideas for the first issue of the *Journal*. He held conferences with the director of the School of Journalism, and with the aid of the managing editor of the *Messenger*, designed a nameplate for the paper's front page. On weekends, Ed would return to Cincinnati to put his ideas into print.

Finally, on May 11, 1961, the first issue of the *Forest Hills Journal* was born. The 16-page paper was sent free to every resident in the area. The paper has grown to where Ed Jr. now reports that circulation is growing at the rate of 35 to 50 a week.

Like all growing concerns, changes are constantly being made to produce a better product. "That's the fun of having your own paper," comments Ed Sr. "When you want to make a change you can without going through all sorts of red tape and unnecessary steps."

The one and a-half years since the first issue of the *Journal* have been tedious but exciting years for all those concerned with the enterprise, especially for the father and son team. But they're finding that the long hours they put in at the shop are paying dividends.

Mrs. Ed Wright, Sr., '37, is finding this to be true also. Tired of waiting for her husband and son to come home at night, she understandably went to work on projects at home. But she had added the feminine touch to the enterprise, doing small but necessary jobs in the front office.

In the near future, Ed Jr. may be forced to share top billing with his sister Marge. A sophomore at Ohio University, she spends her summer vacations working as a part-time reporter, Gal Friday, and errand girl, picking up valuable experience toward her chosen field, journalism education.

AN INFORMAL ALUMNI MEETING and Ohio National Guard drill is held every Tuesday evening at the Athens armory by these Ohio University alumni. Seated left to right are: Spec. Five James H. Clark, '59, Spec. Four Dennis D. Dorogi, '60, Second Lt. James R. Wolfe, '60, and Capt. Einon H. Plummer, '52. Standing left to right are: Staff Sgt. Donald A. Goodman, '62, Capt. James F. Schweikert, '52, and Capt. Andrew J. Chonko, '55. On leave when the picture was taken were Spec. Four Alan D. Paillet, '62, PFC Kenneth A. Rocca, '62, and PFC Harvey E. Raehling, '62.

A Disciplined Club

ONE OF THE MOST unusual alumni groups of Ohio University meets at the armory in Athens, Ohio, every Tuesday evening of the year.

The group's attendance is nearly perfect. Its dress is uniformly neat. A program is always planned. (These may or may not be reasons why the group is unlike other alumni groups.) And, not coincidentally, all of its members concurrently attend drill with Headquarters and Headquarters Battery of the 2nd Automatic Weapons Battalion, 174th Artillery, Ohio National Guard.

At present, this novel alumni "chapter" claims eight members. Three are officers and five are enlisted men. All are graduates of Ohio University. All are male. (Membership requirements, while liberal, contain no provisions for accepting alumnae.)

Three members of the military-minded alumni group serve on the battalion commander's staff. Capt. Einon H. Plummer, '52, is assigned liaison officer, while Capt. James F. Schweikert, '54, is assistant to the operations officer and Capt. Andrew J. Chonko, '55, is the battalion adjutant.

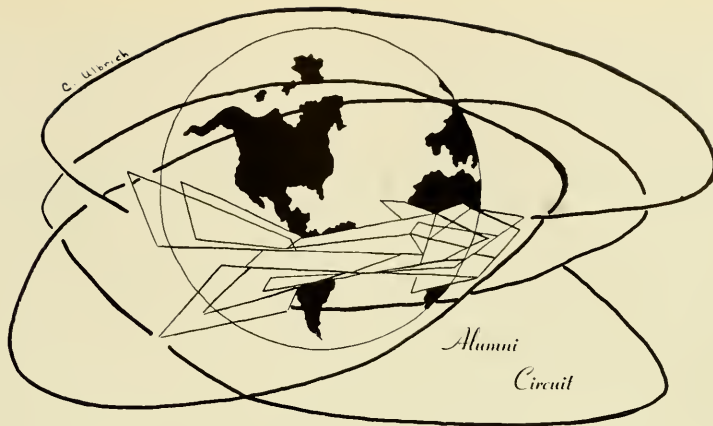

In civilian life, Plummer is an examiner for the state

of Ohio. Schweikert operates his own chemical products firm and Chonko is employed by the Guard as a full-time technician.

All of the enlisted men in the alumni group hold key positions in the battery. Staff Sergeant Donald A. Goodman, '62, is the unit personnel sergeant; Specialist Five James H. Clark, '59, is personnel management specialist; Specialist Four Dennis D. Dorogi, '60, is unit clerk; Specialist Four Alan D. Paillet, '62, is the intelligence sergeant; PFC Kenneth A. Rocca, '62, is assistant operations sergeant, and PFC Harvey E. Roehling, '62, is personnel administrative specialist.

In addition to the eight members of the Athens "chapter," two other alumni serve in the 2nd AW Battalion. First Lt. Phillip E. Willeke, '58, is assigned as a platoon leader in the New Lexington, Ohio, unit, while Second Lt. James R. Wolfe, '60, is an assistant platoon leader in the Logan, Ohio, unit.

Indications are that Ohio University's sons are serving their National Guard units well. The 2nd AW Battalion received the highest ratings during the last training year.

ALUMNI CHAPTERS everywhere are making commitments to the future of Ohio University through involvement in a program to assist in the recruitment of outstanding high school scholars.

Acceptance of this project on the Alumni front is timed to a similar responsibility assigned to the faculty by President Vernon R. Alden.

In commenting on Alumni participation, the President said:

"I am very much interested in our being able to attract the very best students to Ohio University. We shall have no problems attracting a large *quantity* of students simply because of the population increase. There will be increasing competition, however, for *quality* students. The efforts of our alumni clubs throughout the state and throughout the country will greatly help us in our goals."

A pilot program for recruitment of high school scholars has been set up in Fairfield County under the direction of the Lancaster, Ohio, Alumni Chapter.

Milton J. Taylor, chapter president and vice president of the Alumni Association, has named Paul J. Hyne as chairman of a high school relations committee.

A county-wide list of students in the upper one-fourth of high school classes is being compiled by the chapter. This fall, chapter members will form an auto caravan to bring these students to campus. The visiting scholars will be introduced to Ohio University through tours, and a college orientation session conducted by administrative personnel and University College officers.

These students, and their parents, will take part in a "question and answer" panel and complete their day's visit by attending a Bobcat football game.

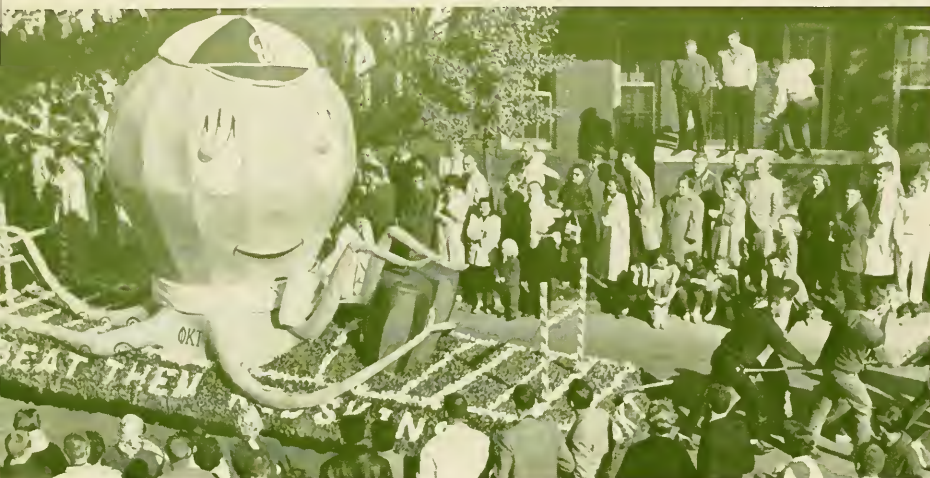

Information compiled from this pilot study will be sent to other chapters. Meanwhile, club presidents have been asked to appoint high school relations committees to establish local contact with prospective students and their parents, to answer questions about Ohio University and to acquaint students with the university's existing visitation and tour program.

Out-of-state chapters are able to perform equally-important services by representing the University at high school-sponsored college orientation programs and by directing outstanding achievers to Ohio.

The pictures below show some Ohio University alumni present at last May's meeting of New York alumni of the Advertising Club. The pictures arrived too late for the June *Alumnus*. At the left, Jesse Zausmer, newly-elected member of the Alumni Association Board of Directors, stands before the microphone as he addresses the New York alumni. Active in planning the New York meeting were, left to right, Miss Patience Brandle, Chapter President Ed Smith, Frank Bowers, Robert Hagen, and Mike Anastas. The photo at the right shows Edwin L. Kennedy, left, member of the Board of Trustees, chatting with President and Mrs. Vernon R. Alden. J. Edward Belsho served as master of ceremonies.
